# What is EcoWasher®?

EcolInventions™ brings you **THE REAL CLEAN** in the form of EcoWasher®, a scientifically proven technology used by hospitals to kill infectious germs in laundry for decades. Its an add-on to your existing washer that transforms cold tap water into a powerful germ-killing, oxygen-charged wash. Our engineers simply scaled down hospital technology, making it available for home use.

# Why Switch to EcoWasher®?

## 1 Do it For Your **Business...**

- Save money on detergent, hot water and fabric softener
- Put less wear and tear on your washing machine
- Maintain a clean environment for your customers with sanitized laundry
- Show off your higher standard for cleanliness, sanitation and environmentalism with provided marketing materials

## 2 Do it For Your **Earth...**

- Reduce energy usage
- Eliminate dumping toxic chemicals from your wastewater, poisoning the water and aquatic life
- Eliminate harmful VOCs going into the air

## 3 Do it For Your **Customers...**

- Provide the most sanitized laundry for your customers' use
- No toxic fragrances from detergents
- No detergent residue on laundry

## Scientific Validation

**In just 5 minutes, EcoWasher® kills:**

100%		<b>E. Coli</b>
94%		<b>Yeast Infection</b>
66%		<b>Mold/Fungus</b>
54%		<b>Strep Throat, Scarlet Fever</b>
46%		<b>Salmonella</b>
34%		<b>Staph Infection</b>

**Imagine how sanitized your laundry will be after a full wash with EcoWasher®**

# What You Can't See Can Hurt You

## Laundry detergents don't kill infectious germs.

**EcoWasher® eliminates the need for laundry detergent, additives and hot water.**

Laundry detergents are expensive and can cause a host of **allergy-related issues** for millions, while dumping **hundreds of billions** of chemicals annually into our environment.

Many washing machines in the U.S. contain deadly and dangerous bacteria. Most laundry cycles don't create a high enough temperature to sterilize laundry. Whatever germs go into the washing machine stay and fester, causing a nasty smell.

# What You Can't See Costs You More Than You Know

## DETERGENT GUNK

EcoWasher® STOPS the GUNK and STINK. Detergent gunk build up wears out a washer prematurely while breeding bacteria, causing stink that can make you sick.

Detergent gunk lurks directly behind your wash wheel and migrates into your laundry during a wash producing a bacterial soup.

# EcoWasher® Benefits

EcoWasher® eliminates the need for laundry detergent.

Detergents build up inside the wash wheel, **corroding** it and perpetuating **bacteria growth and stink**. This leads to **premature** machine repairs and **unsanitary** laundry.

# EcoWasher Towels vs. Detergent Towels

**Detergent residue builds up, and is especially noticable in towels because of the thickness of its fibers.**

Normal detergents are never fully rinsed from laundry after a wash cycle. These detergents continue to build up and can cause fabric fibers to mat. Ecowasher® leaves no residue and can actually pull detergent residues out of previously washed laundry.

This leaves nothing but oxygen and hydrogen as its byproduct, where as detergent usage dumps millions of tons of toxic chemicals into the world's waterways yearly.

# EcoWasher® Hospital Technology **STOPS** the **SICK LAUNDRY CYCLE**

## Detergents **DO NOT** kill infectious germs!

Manufacturers are not required to disclose the poisonous ingredients found in laundry detergent that can make us very sick, and may even cause cancer.

Cancer is the **NUMBER ONE** killer of children next to car accidents **due to chemical exposure.** - [childcancercenter.org](http://childcancercenter.org)

**Protect our children - join the CHEMICAL FREE laundry revolution!**

# Still Not Convinced?

Learn more on why you should make the eco-sensible switch today

**Almost 90%** of the energy consumed by a washing machine goes to heating water

Each household that makes the switch to cold-water washing eliminates about **1,600 pounds of carbon dioxide** emissions a year

Detergents contain toxic chemicals that get washed down the drain in wastewater, contaminating the environment.

Enough plastic bottles are thrown away each year to circle the earth four times.
