Technology that Hospitals
Have Been Using for Decades!

"I installed my EcoWasher in
just a few easy steps & I have
loved it ever since! No longer
using detergent has been
great for my sensitive skin!"

- Review From Customer Eileen S. (Ohio)

SO, WHAT IS ECOWASHER?

Inspired by trusted hospital technology, EcoWasher® is a patented & proven oxidizing laundry & cleaning device designed with your health in mind. By working with your existing washing machine & water supply, EcoWasher® transforms ordinary cold water into a natural oxidizing agent that deep cleans, deodorizes & disinfects your laundry & more without the use of toxic laundry detergent or other hazardous chemical cleaning products.

Tot's Award
Winning Pitch!

EcoWasher® Chemical Free Technology has been recognized by Fox News & awarded the "Most Innovative Product" by the Chicago International Home + Housewares Show. EcoWasher® has also been featured on Home Shopping Network (HSN) & The Big Pitch with Kevin Harrington from Shark Tank!

WHAT YOU CAN'T SEE CAN HURT YOU!

Most leading brands of laundry detergent contain a cocktail of unsafe chemicals. In fact, laundry detergent products on average release as many as 17 toxins which have been contributors to skin irritation, potential neurological damage & more.

Beware of **DETERGENT GUNK**

Over time, home washing machines can build up detergent residue which gets hidden behind your wash wheel & in your door seals. Aside from premature wear & tear to your washing machine, This often unseen slimy, stinky mess contains residual chemicals & germs while encouraging explosive growth of dangerous mold & bacteria which can then be absorbed through your skin!

UNLEASH THE REAL CLEAN

EcoWasher® is now equipped with an auxiliary hose attachment, allowing you to extract powerful, oxidized water on-demand to fight odors, stains & germs right at the source!

CARPETS

Use with Your Carpet Scrubber to Lift Stubborn Dirt & Stains
